

FIRE HYDRANT METERS

Hydrant meters will be used only at hydrants designated by the District and the District must approve any change in location of the hydrant meter. Satisfactory inspection of the meter, fire hydrant and road area of the original location must be completed before a hydrant meter can be relocated. Hydrant meters will not be removed from the District's service area and must be available for meter reading and inspection by District personnel at the designated hydrant location or returned to the District office. Complete and sign this form and submit to Left Hand Water District with the required deposit. The District will meet with the customer at the designated hydrant. Initial connection must be made by a District employee. **After 60 days the District has the right to require the meter be returned for inspection; upon satisfactory inspection and current billing status usage may be extended depending on availability.**

- **Deposit of \$1,500** must accompany this request. The deposit will be held until the meter is returned and inspected. The District will bill the customer monthly, and payment will be due if the meter is held into the subsequent month. After the meter is returned, the deposit will be applied to any applicable damage cost and outstanding invoices; any excess will be refunded. This deposit may be waived if a customer has its own meter, subject to District approval.
- **Proof of Liability Insurance** in excess of \$150,000 per individual and \$600,000 per occurrence is required.
- Rental fee of **\$5 per day** will be charged for each day the meter is in the user's possession.
- Base charge for water usage is **\$10 per 1,000 gallons**.
- Non-refundable **\$50 Administrative Fee** is due at the time of rental (payment must be separate from deposit payment).
- A **\$50 Hydrant Meter Reading Fee** will be assessed if the meter reading is not provided via phone (303-530-4200) or email (amedina@lefthandwater.gov) by the 25th of each month.

Important Information:

- The customer shall load only through the valve on the hydrant meter and not operate the hydrant or hydrant valve.
- All roadways & road shoulders shall be returned to the conditions they were in prior to the fire hydrant usage by the customer.
- The District reserves the right to shut down any usage of the fire hydrant if damaging or unsafe practices are observed.
- In times of restricted use of water in the Left Hand Water District system, the District reserves the right to shut down usage at fire hydrants, without prior notice, when storage and fire flow capacity concerns warrant.

Prior to hooking up the meter, the District will:

- Record meter's reading.
- Record condition of the fire hydrant.
- Restrict hydrant to 250 g/m.

Customer hereby acknowledges understanding the importance of backflow prevention and agrees to utilize a hydrant meter with an approved backflow assembly or maintain an approved "Air-Gap," if approved by the District, at least twice the size of the fill line diameter, as shown in the diagram.

Well Development Water Affidavit (REQUIRED TO BE ANSWERED BY ALL RENTERS)

WILL WATER FROM THIS HYDRANT METER BE USED IN THE DEVELOPMENT OF OIL &/OR GAS WELLS, AS DEFINED BELOW?

(if yes, please fill out oil and gas affidavit)

yes

no

Well Development Water: Water used for the development of oil and/or gas wells encompassing related activities including, but not limited to, drilling oil and gas wells, and hydraulic fracturing of oil and gas wells. Well Development Water shall also include the water that is used in the formulation of products, compounds, or admixtures that may be used in the development of oil and/or gas wells and activities related thereto. Such products, compounds, or other admixtures, after formulation, shall be considered Well Development Water.

I (we) have read the information provided with this request and understand all policies and all charges which may be assessed, and certify and attest that all information is true and correct.
