BUSINESS/HOA

July 13th @ 10:30 a.m. - Northern Water Conservation Gardens & C-BT Interpretive Area Tour!

We will be meeting onsite @ Northern Water's award-winning Conservation Gardens that span several acres of the Berthoud headquarters campus to provide public education on various plants, turf and conservation techniques that can achieve water savings in landscapes. Overall, guests to the gardens will discover efficient irrigation methods and see more than 700 plants and 60 turf grasses that thrive in Colorado's semi-arid climate. While simple in concept, the design of the Colorado-Big Thompson Project can be quite complex so Northern Water created a C-BT interpretive area in the backyard of the Berthoud headquarters. This small-scale replica includes a recirculating water feature with 12 reservoirs, the Continental Divide, and the Alva B. Adams Tunnel to give people a feel for the project and how water is delivered.

Call or email today to make a reservation the tour group is limited, and spaces will fill up fast!

Please include your full name and address and # of guests attending the tour.

Customers attending the tour will have the opportunity to win a \$100 Gift card to the Flower Bin or a Rachio 3: 8 Zone Smart Sprinkler Controller!

Our Plant Select Demonstration Gardens are open by appointment only. Please call our office to schedule an appointment if you would like to come visit or email bwheeler@lefthandwater.gov
